

New York New York

Minutes from the hustle and bustle of city life this new home offers an exclusive and peaceful respite.

Sited at a private prime waterfront location in New York the views from sunrise to sunset are spectacular by any standard.

The 12,000 sq' home is marked for completion in 2007 and the owner and builder chose to integrate a classical Pool Enclosure engineered in the USA by Blue Diamond Conservatories™. It was manufactured at their UK Conservatory facility in England. The Pool Enclosure design took inspiration from a Conservatory at a European castle built centuries ago as pictured above.

The owner and architect had Blue Diamond Conservatories™ engineer Virtual Images of the enclosure for review prior to construction. There is a swimming pool, a lap pool and a spa all within an enclosed climatically controlled environment that's almost UV free! Special extra high performance glazing provides excellent insulation for all season usage. Blue Diamond confirmed that the vertical glass has a R value of 9.5 almost four times better than typical insulating glass units.

The company states that the glazing, framing and roofing materials are ideal for indoor pools and impervious to chlorine and other pool chemicals.
